<!-- end contact-wrapper -->

<!-- footer-wrapper -->
  // code here
<!-- end footer-wrapper -->
```

Custom Section

Home 1 Section

how to change background on home 1. First open style-1.css. Then look for the class .home-wrapper, you will find this code

```
.home-wrapper {
  position: relative;
  background-size: cover;
  background-position: center center;
  background-repeat: no-repeat;
```

```
width: 100%;  
height: 100vh;  
background-image: url("../images/bg-home.png"); << change image here  
}
```

Home 2 Section

here I will explain how to replace video and poster on home 2. First open home-2.html. Then you will find this code

```
<video loop autoplay muted class="home-video" poster="assets/videos/poster.png"  
playsinline> << change poster video here  
  <source src="assets/videos/poster.png" type="video/mp4"> << change video here  
</video>
```

Home 3 Section

for how to change the background image the same as the way in section one. here I will explain about particles.js. to customize the particle, you can open custom-3.js. then search for `"/ * particle.js */` without double quote. then you will find the configuration code. for more details, maybe you can visit the official web of particles.js [here](#)
